Professional Summary

Full Stack Developer with strong hands-on experience building **scalable web applications** and robust **backend systems** through personal and academic projects. Skilled in **Data Structures & Algorithms**, **API design**, and performance optimization. Proficient in **React**, **Next.js** and **Node.js** with practical exposure to production-level applications and **system design** fundamentals.

Technical Skills

- Frontend Frameworks & Libraries:** React, TypeScript, Bootstrap, Tailwind CSS, Framer-Motion
- Languages:** JavaScript, SQL, HTML, CSS, Java
- Backend Frameworks:** Node.js, Express.js, RESTful API
- Databases:** MongoDB, MySQL, Cloudinary
- APIs & AI Tools:** WebSockets, Groq API, JWT Authentication
- DevOps & Tools:** Git, GitHub, Vercel, Render

Projects

UrjaSaarthi | *React, TypeScript, Tailwind CSS, MongoDB, Groq-SDK* | [Live Demo](#) Mar 2026 – June 2026

- Developed an AI-powered solar recommendation platform using **React and TypeScript**.
- Integrated **Groq AI** for personalized energy analysis and recommendations.
- Built interactive dashboards that reduced manual solar estimation efforts by approximately 70%.
- Implemented automated PDF report generation using **jsPDF**.
- Developed scalable and user-centric features that simplified complex solar calculations, improving decision-making through datadriven visualizations and analytics.

Cravings | *React.js, Node.js, Express.js, MongoDB, Tailwind CSS* | [GitHub](#) | [Live Demo](#) April 2026 – Jul 2026

- Developed a full-stack food delivery application using the **MERN stack** (MongoDB, Express.js, React.js, Node.js).
- Built responsive user interfaces for food browsing, cart management, and order placement.
- Implemented secure user authentication and authorization using **JWT**.
- Developed 10+ **APIs** for menu, authentication, and order management.

ACHIEVEMENTS

- Solved 150+ DSA problems on **LeetCode**, strengthening problem-solving and algorithmic skills.
- Project Submission, **Navkalpana Hackathon (2026)**: Engineered **FitAI**, an AI-driven full-stack application under the HealthTech theme focused on intelligent fitness analysis.
- Project Submission, **Cognizant Hackathon (2026)**: Developed **CareIQ**, an AI-powered full-stack healthcare platform utilizing predictive analytics for patient risk detection.

Education

Rajiv Gandhi Proudhyogiki Vishwavidyalaya (RGPV)
Bachelor of Technology in Computer Science (Software Product Engineering) | CGPA: 7.8

Bhopal (M.P.), India
Oct 2023 – June 2027
